# **ClearRide** – Powered by *PreventX*<sup>™</sup>

*The Premier Antimicrobial Barrier Solution*

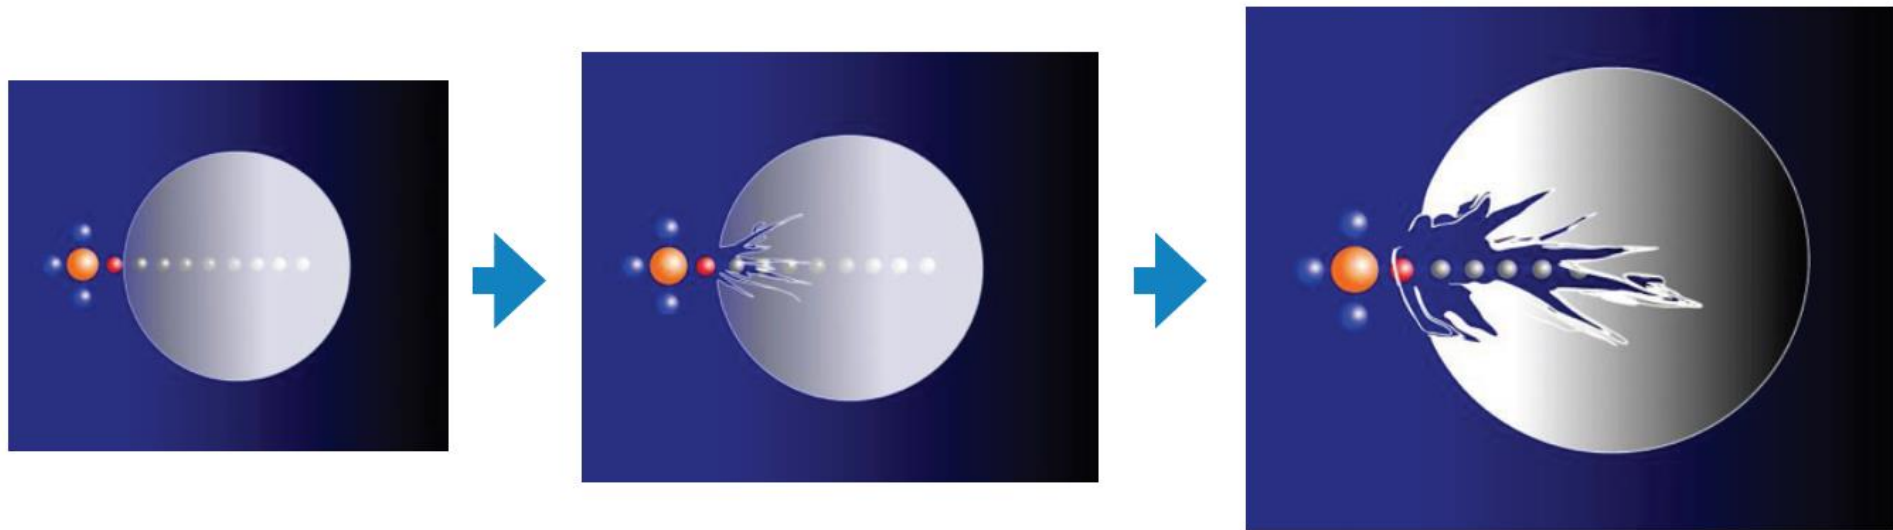

**Durable coating added to all high touch surfaces of our products and available in five-gallon pails for application to existing buses.**

Enduring antimicrobial protection against bacteria and viruses on hard and soft high-touch surfaces of American Seating's products.

### How It Works

**ClearRide** – Powered by *PreventX* is an antimicrobial barrier treatment that protects surfaces from microbes. **ClearRide** is an invisible bio-barrier coating acts as sharp blades to microbes. When microbes come in contact with the treated surface, they are punctured and destroyed.

# New and Improved Antimicrobial Solution

(*ClearRide* over competition)

- **Greater shelf life of 24 months vs. 12 months**
- **Non-corrosive to aluminum and other metals**
  - Neutral pH of 7, same as water and free of the toxin, methanol
- **Lasts up to 30 months on non-wear surfaces**
- Same active ingredients as *Aegis*
  - 3-(trihydroxysilyl) propyldimethyloctadecyl ammonium chloride
- **Greater List of Pathogens Destroyed or Inactivated**

## New and Improved Antimicrobial Solution

- **Bonds to all surfaces and will not migrate or leach**
  - Including polished stainless steel, glass and plexiglass
- **Odorless and colorless, yet protects surfaces from deterioration**
- **Dries completely within minutes**
  - Up to 30 minutes depending on temperature and humidity
- **Makes future cleanings easier**
  - A cleaning and disinfecting program is still required before and after
- **Prevents mold and mildew**
- **Eliminates odors casing bacteria**
- **EPA registered as a biostatic agent**

*As recommended by APTA:*

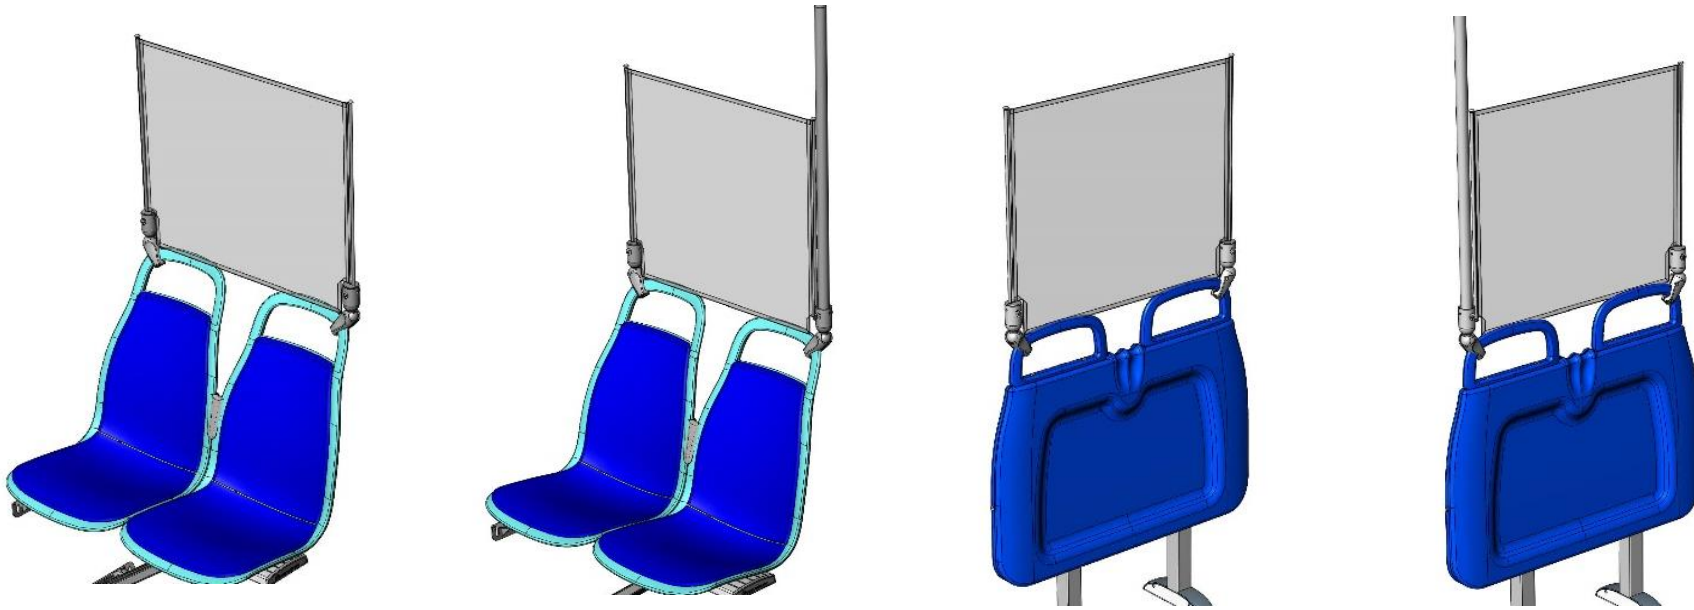

**Field testing is available to measure hygiene cleanliness levels before and after *ClearRide* with my own ATP equipment.**

# Sneeze Shields:

## Product Applied PPE

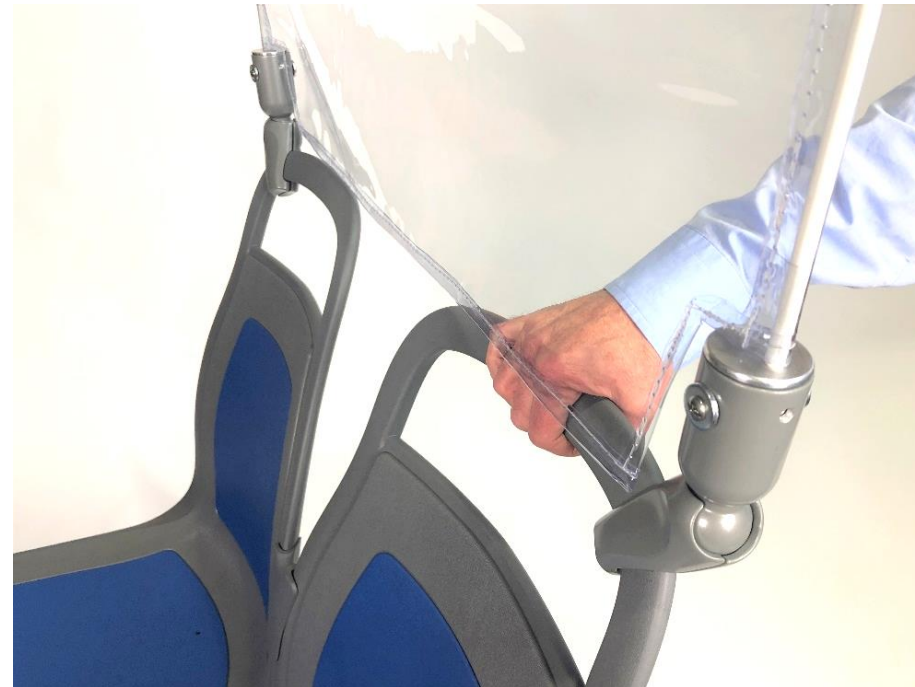

Applicable to **INSIGHT**<sup>®</sup>, **VISION**<sup>®</sup> and **METROPOLITAN**<sup>®</sup>  
two-pass, forward facing seats and standard barriers with double grab rails.

# Sneeze Shields:

## Product Applied PPE

The Sneeze Shield support structure utilizes existing and added stanchion cup assemblies with fiberglass rods for vertical support. The shield itself is a 20-gauge, flexible, clear vinyl approximately 30" wide by 25" height. These solutions are retrofittable to existing vehicles or available for new bus builds.

# InSight Classic Non-Upholstered Onserts:

Aftermarket Parts for 2015 and Prior Bus Sets of Seats

Easily cleaned, composite-resin onserts reducing maintenance time and cost as well as improving riders' hygienic perception of a transit vehicle.
